

1 Introduction

We respect your privacy and we process your personal data only with the purpose for which you have shared your data. In this privacy statement, we aim to make it clear what personal data we collect and store and for what purpose.

2 Definitions

SNiC 2022: CelerIT: The conference organized by Stichting Nationaal Informatica Congres on November 30th 2022 and the organizational committee behind it. Hereafter also named “CelerIT”.

CelerIT committee: the organization behind CelerIT. Can also be referred to as “the CelerIT organization”.

Participant: Visitor of CelerIT, who is in possession of a valid ticket provided by their study association.

Partner: company or other organization (financially) contributing to CelerIT and optionally also present at CelerIT.

3 Processes where personal data is processed

To organize CelerIT, certain processes take place where personal data is involved. These processes are listed below.

Unless otherwise noted, processing happens on the ground of legitimate interest.

3.1 Registration for CelerIT

When registering for CelerIT, either as a participant or as someone else, one has to provide their personal details. This data includes at most: name, email address, study program, dietary wishes and (indirectly) study association. Those details will be stored in the CelerIT website database. These details will be used to identify users during the conference.

3.2 Registration for tracks

To register for the tracks, participants need to use their personal account on the CelerIT website. The website will register who registered for which tracks. This information is only visible to the corresponding participant and the committee.

3.3 Scanning of QR codes

During the conference, partners can scan the QR codes of participants, which can be found on their personal page on the CelerIT website and on their personal keycards. When a partner scans a participant's QR code, this participant will be added to the partner's list of connections. After the conference, the partner will receive this list. See also section 4.3 of this privacy statement.

3.4 Resume for speeddates

As preparation for the speeddates, participants can send their resume beforehand to CelerIT. CelerIT will then share these resumes with the partners present at the speeddates. The committee will request these partners to destroy the shared resumes once CelerIT has taken place.

3.5 Photos and video recordings

During CelerIT, photos and video recordings will be made of the conference. All people present at CelerIT agree to being on these photos or videos. After CelerIT has taken place, these photos and videos will be shared on the social media channels of SNiC. These photos and videos may also be used by future SNiC conferences for promotional reasons.

4 Processing by third parties

For CelerIT, processing of personal data is also done by third parties. These parties are listed below.

4.1 Webhosting

The CelerIT website is hosted on the digital infrastructure of Study Association GEWIS. For this, we refer you to the [privacy policy of GEWIS](#). Relevant sections are section 2.19 GEWIS as processor and section 4 Securing Personal Data and Restriction of Processing.

4.2 Caterer

To adhere to the dietary wishes of all people present at CelerIT, the dietary wishes of everyone are collected. The caterer will receive a list of different dietary wishes and how many people have these wishes. This personal information is therefore shared anonymously.

4.3 Partners

After CelerIT has taken place, all partners will receive a list of all participants they connected with during the conference. This list includes for each participant their name, email address and study program.

As mentioned in section 3.4, resumes for the speeddates are also shared with companies. They are requested to destroy these after the speeddates have taken place.

4.4 Study associations

During the period between sharing ticket codes and the CelerIT conference on November 30th, the CelerIT committee will share the list of registered participants with their corresponding study associations. This gives each study association a list of who still has to activate their CelerIT ticket.

5. Privacy rights

If a data subject wishes to see what data is being stored about them, they can send an email to the CelerIT organization who will then show them the data using the contact details on the CelerIT website.

CelerIT will not unnecessarily store this personal data after the conference has taken place. Therefore, all personal data will be deleted at most three months after the CelerIT committee has been discharged, but at least before July 1st 2023.
